### **Reasons for allowance**

1. Claims 1-23 and 28-30 are allowed.
2. The cited art either alone or in combination fails to teach the claimed invention of an electronic assistant configured to handle instant messages between a first user and a second user who is away or offline. The assistant receives a request to take an action from the first user after sending a message to the first user that the second user is away or offline. The assistant then takes the action requested by the second user.

The closest prior art (Simpson, US Patent Application #09/923,320) teaches a method for notifying an offline user of an online interaction in which the offline user could participate. The method monitors activities occurring in a network and based on notification criteria, forwards a message to the offline user of an online transaction in which he could participate. However, Simpson does not teach an electronic assistant configured to receive a request to take an action from the first user after sending a message to the first user that the second user is away or offline and taking the action requested by the second user.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
